It is the age of online business, with people all over the world building virtual businesses and earning money from essentially nothing but a laptop, smartphone and an internet connection. Although there are many forms of online business, selling virtual information products is considered by many people to be one of the best businesses to get into. By information products, I m talking about products like eBooks, audio products, video products etc. Why are information products so great? Just think about it for a second. You can write (for example) an eBook or create a video course ONCE and then sell thousands of copies of it as a digital download. Once created you can sell it over and over again without doing any further work. The customer finds your product, decides to buy it and then wooosh!! The money lands in your account automatically and the customer has downloaded their purchase from your website before you ve even realized you ve made a sale. Now compare that to a traditional retail business where you have to constantly buy in stock and ship products to customers - or even get a product manufactured. There s more too. Not only are information products quite possibly the perfect product for the reasons we ve just talked about - they are also very much in demand. Gathering and packaging up information into products like eBooks and video courses is big business - and it is possibly likely to grow further still over the coming years.
