Improving Data to Analyze Food and Nutrition Policies (Paperback)

By and Decision Making Research Panel on Enhancing the Data Infrastructure in Support of Food and Nutrition, Committee on National Statistics, Division of Behavioral and Social Sciences and Education

National Academies Press, United States, 2005. Paperback. Book Condition: New. 223 x 152 mm. Language: English . Brand New Book. Several changes in the United States over the past two decades have implications for diet, nutrition, and food safety, including patterns of food consumption that have produced an increase in overweight and obese Americans and threats to food safety from pathogens and bioterrorism. The changes raise a number of critical policy and research questions: How do differences in food prices and availability or in households' time resources for shopping and food preparation affect what people consume and where they eat? How do factors outside of the household, such as the availability of stores and restaurants, food preparation technology, and food marketing and labeling policies, affect what people are consuming? What effects have food assistance programs had on the nutritional quality of diets and the health of those served by the programs? Where do people buy and consume food and how does food preparation affect food safety? To address these and related questions, the Economic Research Service (ERS) of the U.S. Department of Agriculture (USDA) asked the Committee on National Statistics to convene a panel of experts to provide advice for...
