Date :2006-04-01 version 1. Part design classic textbook. ProENGINEER Since 1988 the face of the parameters of the design since the advent of 3D CAD/CAM system has become the standard software. widely used in electronic. mechanical tooling and industrial design industries. This book describes how to use ProENGINEER create complex three-dimensional solid or surface. including ProENGINEER commonly used techniques. feature creation failed approach to mixing. scanning and hybrid scanning method to create complex solid or surface characteristics. and the use of the boundary line to create surface features. and finally to more comprehensive example to illustrate the complexity of the solid or surface features of the design of complex parts in the actual application. Book through detailed component design simple example to cultivate the reader the actual design capability and product development capabilities. Book is informative. concise design paradigm for electronics. machinery. molds and other areas of industrial design engineers use computer-aided engineering colleges are also suitable as a design study materials. Contents: Chapter 1. the processing characteristics of the failure to create a common feature of ProENGINEER design skills to create 2 treatment failure . . Chapter 2 to create complex mixing characteristics of a hybrid option shows two examples of Chapter 3 of blended to create complex scanning characteristics of a variable section sweep 2 helical scan . scan . Chapter 4 to create complex mixing characteristics of an option to scan a mixture of 2 scan shows an example of Chapter 5 mixed to create the surface features of the boundary line option Description 2 1 Boundaries boundary surface of the sample in Chapter 6 Advanced Part Design 1...
